

AEGIS SPARES KITS

Expeditionary AG Spares Modules

More than one hundred Aegis equipped ships have been deployed across five navy fleets worldwide. Some, but not all, of those vessels have undergone the modernization that includes Technology Insertions (TI) and Advanced Capability Builds (ACB). For the rest of the ships, suitable support and maintenance are required to keep the Aegis Weapon Control Systems effective and operable.

True North Enterprises has delivered over \$15M in Aegis spares equipment to the US Navy and the Arleigh Burke class of guided missile destroyers (DDGs). These kits have been procured to support the maintenance of not yet enhanced systems as well as scheduled "Baseline" upgrades. Our modules include a variety of spares, technology refreshment components, and other supplemental shipboard electronics.

Examples of Products Included in Modules:

Power Supplies	Display Units	Gaskets	Fasteners
Circuit Breakers	Various Switches	Connectors	Circuit Card Assemblies
Converters	Sockets	Valves	Cabling
Fan Assemblies	Hose Assemblies	Tubing	Display Units
<i>and more...</i>			

Kits are customizable and scalable to each end user's specific requirements.
